Professional Summary

Final year student majoring in Information Systems, with a strong foundation in system analysis, product documentation, data analysis, and software development. Experienced in analyzing business processes, gathering requirements, designing user flows, testing product features, and translating user needs into practical digital solutions through academic projects in healthcare, e-commerce, and customer behavior analytics.

Education

University of Information Technology - VNUHCM

Ho Chi Minh City, Vietnam

Bachelor of Information Systems

2023 – Present

GPA: 8.21/10.0

Relevant coursework: System Analysis and Design, Database Management Systems, Software Engineering, Statistical Analysis, Data Mining, Mobile/Web Application Development, Agile/Scrum.

Skills

Product & Business Analysis: Requirement Gathering, Business Process Analysis, User Research, Use Case Modeling, Product Documentation, Product Testing, Agile/Scrum.

Data & Analytics: SQL, Statistical Analysis, Customer Behavior Analysis, Data Visualization, Machine Learning Fundamentals.

Tools & Technologies: Figma, Git/GitHub, Oracle Database, MS SQL Server, MongoDB Atlas, Android Studio, AWS, ReactJS, Node.js, Spring Boot.

Languages: Vietnamese (native), English (TOEIC Listening & Reading 795/990, TOEIC Speaking & Writing 300/400).

Projects

LapZone – System Analysis and Design for Laptop E-commerce Platform

10/2025 – 12/2025

Role: System Analyst

- Conducted stakeholder interview and analyzed existing retail workflows to identify operational issues in product, order, voucher, inventory, and revenue management.
- Gathered and documented functional and non-functional requirements for customer and administrator roles.
- Designed end-to-end business processes including product management, cart, order processing, payment, inventory control, voucher management, and revenue analytics.
- Developed use cases, activity diagrams, sequence diagrams, class diagrams, and relational data models to support system implementation.

MyHealthCare – Healthcare Appointment Management Platform

10/2025 – 01/2026

Role: Front-end Developer

- Participated in feature planning for an online healthcare appointment system supporting patients and doctors.
- Designed user flows for appointment booking, medical service access, and doctor schedule management.
- Proposed interface improvements to enhance usability and improve the patient booking experience.
- Collaborated with team members to align business requirements with technical implementation.

Telecom Churn Prediction and Customer Behavior Analysis

11/2025

Role: Data Analyst

- Analyzed customer behavior data from over 2 million telecom subscribers to identify churn patterns and retention opportunities.
- Conducted statistical analysis and interpreted machine learning results to uncover key factors influencing customer retention.
- Evaluated predictive models including Random Forest and interpreted feature importance to support business decision-making.
- Proposed data-driven recommendations such as customer segmentation, retention campaigns, and loyalty improvement strategies.

Conscia – Digital Well-being Mobile Application

03/2026 – 05/2026

Role: Product-oriented Developer

- Designed a mobile solution to help users understand and improve smartphone usage habits.
- Planned behavior-oriented features including screen-time tracking, usage reflection, weekly reports, and smart reminders.
- Developed user flows focused on digital well-being, habit improvement, and user engagement.

Experience

Online English Tutor – FUNiX

2025 – Present

- Designed personalized learning plans based on student needs, learning progress, and feedback.
- Communicated learning outcomes and progress updates to students and parents.
- Strengthened communication, presentation, and stakeholder management skills through 1-on-1 tutoring.

Certifications

Foundations of User Experience (UX) Design – Google, 06/2026

Foundations: Data, Data, Everywhere – Google, 06/2026

AWS Academy Graduate – Cloud Architecting, Amazon Web Services, 04/2026

AWS Academy Graduate – Microservices and CI/CD Pipeline Builder, Amazon Web Services, 02/2026

Crash Course on Python – Google, 06/2026
